

Actions on 20-21 January 2022

1. Approved maintenance/integration of new storage attached to the Gateway (170Tb were added)
2. Approved new queue policies for the now 22+64 node layout of the gw partition of the GW. The 64 extra nodes had already been integrated and tested in gwdbg. Queue policy:

gw/normal : Max 512 cores per user

gw/qos_qwlong : Max 192 cores per user (2 jobs max)
