

# DMP Implementation Status of IPP

2024-10-02

# EasyBuild

- Still not get Qt6 to compile
  - Gateway team seems to have the same problem
  - Workarounds so that it is not required
- Now have AMNS/foss installed
  - texlive/intel needed by AMNS/intel still being compiled
- By no means is EasyBuild a magic bullet
  - End up having to find recipes that are local to
    - ITER
    - Gateway
  - Or making local modifications that are also not shared (at the moment)
  - And installing some stuff takes a long time ...
    - 4 hours 19 mins 58 secs to install texlive

# uda.py data access times
