

EUROfusion PSD Management Meeting

# WPSA report 2026-01-26

**Carlo Sozzi**

## WPSA news

- Edge TS port plug and VUV installation starting in February 2026.
- 5 EuF personnel (+1 Internship TUE Univ.) on site from 2<sup>nd</sup> February
- Divertor VUV spectrometer: Severe damage during shipping
  - One box (cabinets) damaged on the side
  - Mirrors of VUV got damaged by vibrations. Loose screws and dust in the plug
  - Action being taken with the shipping company (F4E)

- Confirmation of the installation timeline for DivVUV after the inspection to be performed by the team to assess the damage (also with the shipping company inspector) and plan the repair
- Some margin (2 weeks) in the schedule

- **MGI:**
  - Starting tests with current design to define max pressure allowable for operation
- **Pellet**
  - Factory launcher acceptance test planned next month => delivery at IPP Garching, assembly and test.
  - Report on centrifuge-extruder integration delivered
  - F4E tender for extruder procurement out soon
- Visit to advance collaboration in Magnetic control activities being planned for February/March (Coupling of MECS simulator with CREATE control algorithms)
- Next Technical Coordination Meeting planned in second half of May at EPFL
- **2025 reporting**
  - 41/56 reports delivered
