

DTE Training Session No. 1 - introduction to Data Dictionary and IMAS

Introduction: Michał K. Owsiak (PSNC)

Presenters: Frederic Imbeaux (CEA), Yannick de Jong (Ignition Computing) , Ludovic Fleury (CEA)

28.05.2026

The Goal of DTE Training Session

The main goal is to make people aware of some concepts and tools

- Today's session is devoted to following topics
 - Concepts related to Data Dictionary and IDSes - structuring and naming of data
 - Frederic Imbeaux - frederic.imbeaux@cea.fr
 - Means of accessing IDS compatible data using Python
 - Yannick de Jong - ydejong@ignitioncomputing.com
 - Means of accessing IDS compatible data using Matlab
 - Ludovic Fleury - ludovic.fleury@cea.fr
- You can find the list of follow up session on the next slide and dedicated Confluence page:
 - <https://link.eufus.psnc.pl/YeKzSG>
- We encourage you to join Mattermost channel for most recent information from ACH-04
 - https://chat.eufus.psnc.pl/signup_user_complete/?id=rn7pymnt4pns3keacw4sgdolmr&md=link&sbr=sa

The Goal of DTE Training Session

The main goal is to make people aware of some concepts and tools

- Session No. 2
 - Visualization of the data (IBEX)
 - Validation of the data (IDS-Validator)
- Session No. 3
 - Running the code in Python based wrappers
- Session No. 4
 - Mastering Gitlab/JIRA/Confluence inside EUROfusion Software Stack
- Session No. 5
 - SimDB - how to use the tool
 - SimDB - what is available at the Gateway
- Session No. 6
 - Introduction to sharing and accessing data using UDA
 - Introduction to mapping inside UDA
