Scenario modelling for JT-60SA
Status report

28 Oct 2026

M. Cecconello and J. Ericsson

Department of Physics and Astronomy, Uppsala University, Sweden

This work has been carried out within the framework of the EUROfusion Consortium, funded by the European Union via the Euratom Research and Training Programme (Grant Agreement No 101052200 — EUROfusion). Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Commission. Neither the European Union nor the European Commission can be held responsible for them.

JT-60SA modeling in TRANSP/NUBEAM

- TRANSP/NUBEAM with DRESS simulations for scenarios in progress for camera & spectrometer design
- Scenarios under consideration: #1, #3, #4 and #6
- Progress delayed with respect to original plan: expected conclusion by first quarter 2027
